## *Velodyne's Product Training at CEDIA*

### Getting Great In Any Bass Installation

September 10th

~

4:00 to 5:30

~

Marriott Hotel  
*The Florida Room*

Powerful, accurate bass is the foundation upon which any home theater installation is built, and nobody knows bass better than Velodyne.

This session first addresses the fundamentals of bass response in a room, then explains how to select the right subwoofer for the installation and how to place it.

We'll then discuss integrating the sub with the main speakers for a seamless interface and flat response.

Finally, we'll talk about bass room management options and what technology Velodyne brings to the table including the new Digital Drive® Version 2.0 room EQ software.

***Attend the training and have an EXTRA chance to WIN the SPL-800R being given away at the Velodyne Booth #604!***
