Velodyne Announces The SubContractor™ (SC) Series Subwoofers A Reference Sub for Every Installation Situation

SC-IW (In-Wall)

The SubContractor™ (SC) Series Subwoofers - a reference sub for every installation situation.

The SC-IW (In-Wall) is the first in-wall to fit flush in a 2x4 studded wall and deliver reference quality performance. The patent-pending SC-IW driver fires vertically in the wall for maximum throw and minimal vibration to reproduce the most demanding home theater and music with authority, accuracy and low distortion. The SC-IW, with a unique 2-piece cabinet design, is easy to install whether it's for new construction or retrofit. The SC-1250, a rack-mountable amplifier that powers the SC Series, features 3000 watts dynamic / 1250 watts RMS power and can easily drive twin SC-IW subs using standard speaker wire. At last the Velodyne of in-wall subs!

Features:

- Fits FLUSH in a standard 2x4 studded wall
- Easy to install - two box system for new construction or retrofit
- Connects with conventional speaker wire
- Amazingly deep, powerful bass performance with minimal wall vibration
- The matched SC-1250 amplifier can drive one or two SC-IW subs
- Includes a standard grill for easy installation and field servicing and a designer-friendly 5" high grill (requires dry-walling over driver cabinet)

SC-1250 Amplifier

The SubContractor™ (SC) Series Subwoofers - a reference sub for every installation situation.

The SubContractor Series is a complete line of powerful, easy-to-install subwoofers designed to meet any custom installation need, whether it's in-room, in-wall, in-floor or in-ceiling. At the heart of the SC Series is the 1250 watt SC-1250 rack-mountable amplifier with a built-in 7-band automatic room-EQ. The SC-1250 uses Velodyne's patented Energy Recovery System (ERS) Class D switching amplifier. With 3000 watts dynamic power, it sports more than enough headroom to reproduce the impact and excitement of the most dramatic special effects and the lowest musical frequencies with detail and definition. Need even more bass? No problem. The SC-1250 can control up to two SC Series subs.

Features:

- Incredibly easy to install and configure
- 1250 watt RMS (3,000 watt peak) amplifier power
- Reliable Class D Energy Recovery System (ERS) switching design (patented)
- System friendly features: 12V trigger, IR repeater jack, RS-232 controllable (Creston Certified)
- Easily configured for up to TWO subwoofers
- Comes complete with remote, microphone and rack mount hardware
